Velvotouch

Feminine hygiene - Baby diaper - Beauty Care - Medical

New patented

VELVTOUCH line includes the new patented layers produced with a special technology aimed to give enhanced features to regular substrates. By this innovative process a plenty of different materials can be treated: perforated plastic film, plastic film, spunbonded and elastic film. A variety of synthetic fibers (as polyester, polyamide and viscose) can be combined with many personalized patterns to offer a unique custom-made layer.

VELVTOUCH layers highlight our attention on:

- Extremely soft touch
- 3D effect
- Trendy looking

According to their substrates, **VELVTOUCH** products fit specific application fields as:

- Topsheets for sanitary napkins and panty liners;
- Backsheets for baby diapers and incontinence pads;
- Elastic materials for baby diapers;
- Wipes for Beauty care;
- Substrates for Medical application.
